

2011 CORPORATE FACT SHEET

For people. For the environment. For a healthier and cleaner future.

PerkinElmer, Inc. is a global leader focused on improving the health and safety of people and the environment. Creating solutions that help find, prevent and cure threats to human and environmental health, PerkinElmer's mission ranges from enabling discovery of more effective diagnostics and therapies, to making sure that our food, water, consumer products and the places where we live and work are safe from contaminants. PerkinElmer takes action to create a better tomorrow for people and the environment.

HUMAN HEALTH

Our diagnostic, biopharma and life sciences research instruments, reagents and software are backed by clinical resources and support services to help fight disease, provide accurate medical insights and develop therapies more quickly. We are:

- Maker of technologies that touch over **27 million births and pregnancies** a year
- A global leader in first trimester pre-natal screening and neonatal screening that saves the lives of over 40 babies every day
- The second-largest umbilical cord blood banking provider for potentially treating **80 life-threatening diseases** within families
- The world's **number one cellular imaging technology company**, driving the development new and effective treatments with industry-leading biological and functional technologies for cellular science research
- The **world's leading supplier** of amorphous silicon **digital x-ray detectors** to preserve healthy tissue and speed recovery time for cancer patients
- The **world leading provider** of radiometric detection and reagents, multi-mode plate readers and flat panels for digital x-ray imaging systems
- Integral to drug discovery with the **largest GPCR and Kinase product portfolios**, enabling research into over 75% of drug pathways

ENVIRONMENTAL HEALTH

PerkinElmer is dedicated to the quality and sustainability of the environment. With our analytical instrumentation and leading laboratory services, we focus on improving the integrity and safety of the world we live in. We are:

- Maker of **environmental monitoring technologies** for a cleaner planet
- A market leading provider of analytical techniques – including Inorganic, Molecular Spectroscopy and Thermal Analysis and in Gas Chromatography
- The **most experienced multi-vendor laboratory service organization** and the number one provider of comprehensive lab management services for analytical equipment, with over 400 customers and over 10 years of experience
